UMAJIRUSHI

株式会社馬印
since1896

About us

Established in 1896, we have a long history of manufacturing and selling blackboards, whiteboards, chalk, and other stationery products in Japan. Recently, we have expanded into international markets with a "differentiation strategy", focusing on providing unique, high-quality products and services. Below are some of our key strengths:

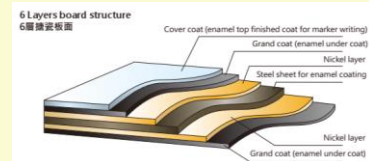

Our product

We manufacture a wide range of products, including whiteboards, blackboards, bulletin boards, and other board stationery. Our products are made from non-formaldehyde and biodegradable materials, which are safe for the environment. Our company is a member of the Green Purchasing Network (GPN), a large organization that encourages consumers to choose high-quality, eco-friendly products.

Our best-selling enamel whiteboard, with a surface 2-4 times harder than other boards on the market, is especially popular. You'll be impressed by its durability and long-lasting quality.

Customized case

Vertical Whiteboard panels with hidden door

Size: 6000(W) x 3100(H) mm
Photo taken at The Chinese University of Hong Kong

Frameless Non-reflective soft whiteboard wall
